

# BARRIERS & DRAPES

## Barriers

Barriers are an essential part of any comprehensive radiation safety plan, shielding healthcare professionals from scatter radiation during procedures. Burlington Medical's mobile lead barriers provide dependable, body protection with the flexibility to move. Designed for stability, durability, and clear visibility, they're a non-wearable protection layer, ideal for long or complex procedures. Built for lasting performance, they maintain their structural integrity through years of regular use, minimizing replacement needs.

## Drapes

Table drapes shield the lower body from scatter radiation that originates beneath the procedure table, where x-ray tubes are typically positioned. As the first line of defense, quality and durability are critical. Burlington Medical's table drapes are handcrafted to resist cracking and fraying from daily use, maintaining reliable radiation protection and infection control.

### Custom Drape

Custom size drape

- + **DIMENSIONS:** Custom
- + **SHIPPING WEIGHT:** Custom
- + **COLOR:** Dartex or Gray Vinyl
